## Who Is This Vendor Assessment For?

NelsonHall's GDPR Services profile on IBM is a comprehensive assessment of IBM's offerings and capabilities designed for:

- Sourcing managers monitoring the capabilities of existing suppliers of GDPR services and identifying vendor suitability for security services RFPs

- Vendor marketing, sales, and business managers looking to benchmark themselves against their peers

- Financial analysts and investors specializing in the IT services sector.

## Key Findings & Highlights

This NelsonHall vendor assessment analyzes IBM's offerings and capabilities in GDPR services.

IBM structures its GDPR solutions around the three high-level outcomes of compliance, data protection and the management of personal data. These solutions include its investments in machine learning powered accelerators.

IBM has a five-phase methodology framework for GDPR covering assess, design, transform, operate, conform. Within each these stages, IBM addresses both the compliance, privacy and security requirements of GDPR.

## Scope of the Report

The report provides a comprehensive and objective analysis of IBM's GDPR services offerings and capabilities, and market and financial strengths, including:

- Identification of the company's strategy, emphasis, and new developments

- Analysis of the company's strengths, weaknesses, and outlook

- Revenue estimates

- Analysis of the profile of the company's customer base including the company's targeting strategy and examples of current contracts

- Analysis of the company's offerings and key service components

- Analysis of the company's delivery organization including the location of delivery locations.
